Click “Finish”.

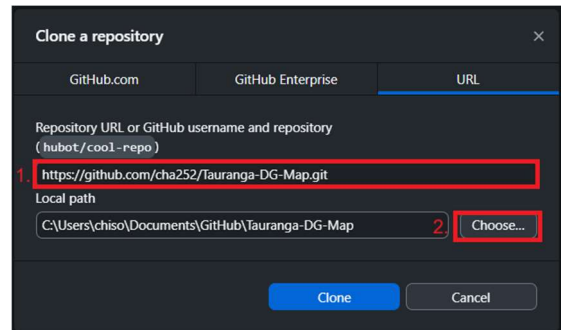

Setting up the Map

This needs to be set up so that when the excel spreadsheet is updated, we can push the changes to the map.

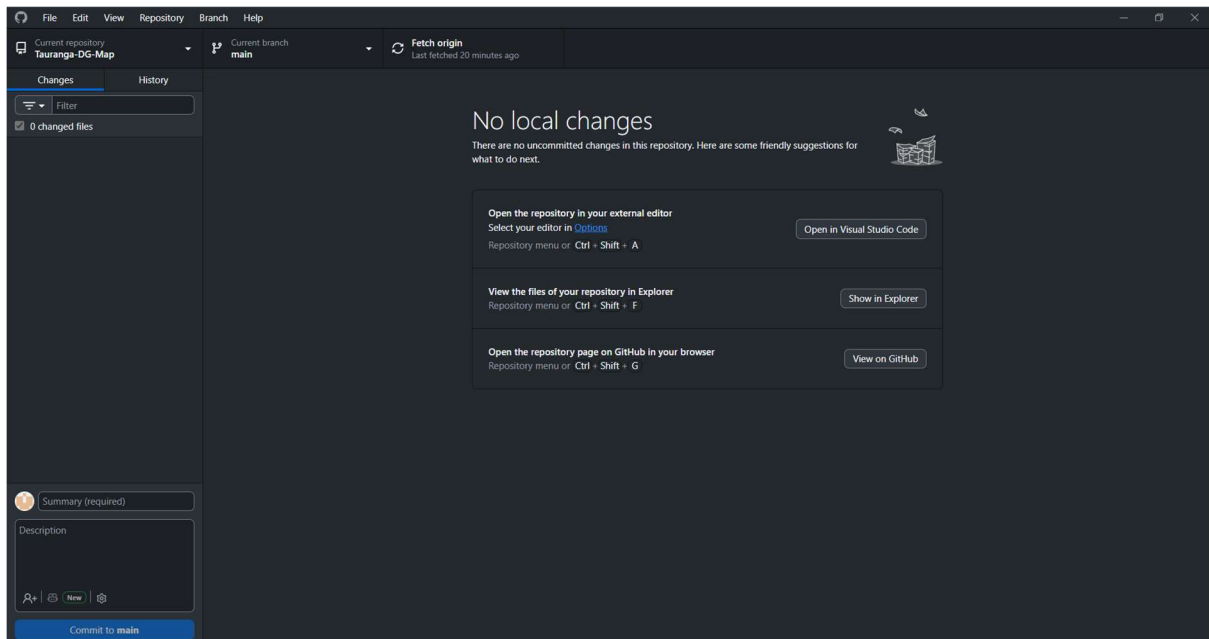

Step 1

1. Click File > Clone Repository
2. Choose where to save the project.

This will create a copy of the most recent files on your device.

This should be the GitHub Desktop screen – go to [Tauranga DG Map](#) for the most recent version.

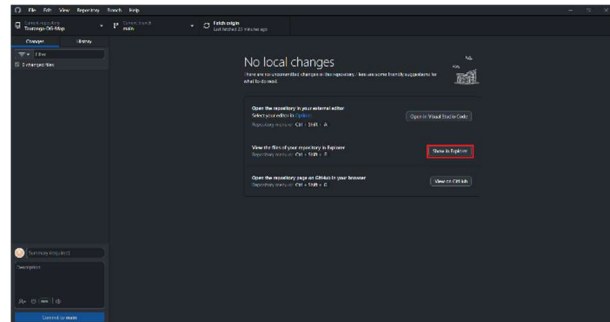

Updating the DG Map

Step 1

Click Show in Explorer or Ctrl + Shift + F to open the folder where everything is kept.

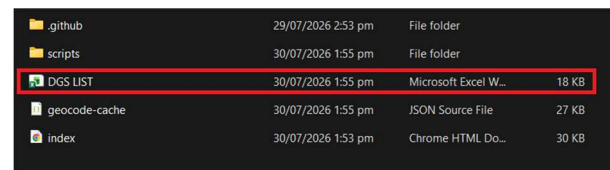

Or

Manually navigate to where the project is saved on your computer.

Step 2

Open the excel file.

Step 3

Add/remove/update data as required.

(See **Getting/Updating the Data**).

Always save when changes have been made (Ctrl + S).

Adding Jobs - Step 3

Remove all jobs already in the spreadsheet – If you know how many jobs you have created select the top x number of jobs.
i.e. If you created 10 new DG jobs, select the first 10 rows.

Adding Jobs - Step 4

Paste anywhere into DGS List making sure that the columns line up.

Copy/paste the ICP into GIS and update the OH/UG column for that row.

Save (Ctrl + S).

Continue from Step 4 in Updating the DG Map.
